## **Most Innovative Products Contest at World of Concrete Announces Winners**

**Washington, DC March 7, 2007** – The winners of Most Innovative Products contest have been announced. Each year, World of Concrete exhibitors submit products to compete in Hanley Wood's Most Innovative Products contest. This fifth annual event, sponsored by CONCRETE & MASONRY CONSTRUCTION PRODUCTS, combines World of Concrete attendee voting with expert evaluations to give both Attendees' Choice and Experts' Choice awards to products exhibited at the show.

Product entries in this year's Most Innovative Products contest maintained high levels with 137 products in 14 categories. Industry voting participation grew, with more than 2,600 ballots cast online and in-person to pick the winners in each category.

The increase in votes was driven by the success of the 2007 World of Concrete, which shattered all previous registration and exhibit space records. More than 1,700 exhibitors occupied over 900,000 net square feet, and with registrants in excess of 91,000, WOC 2007 was the largest show in its 33-year history.

Winners will be published in the March/April 2007 issue of CONCRETE & MASONRY CONSTRUCTION PRODUCTS, as well as in post-show issues of CONCRETE CONSTRUCTION, MASONRY CONSTRUCTION, and THE CONCRETE PRODUCER; and online at CONCRETE CONSTRUCTION online, MASONRY CONSTRUCTION Online and THE CONCRETE PRODUCER Online.
